6300

Next last km

Find t to decel: $v=0$ $u=20$ $a=-2$

$\Rightarrow t = -10 \text{ secs}$

Time at 20 ms^{-1} :

Area = 1000

$20 \cdot t + \frac{1}{2}(20)t = 1000$

$\Rightarrow 20t = 900$

$\Rightarrow t = 45 \text{ secs}$

Total next time = $60 + 157.5 + 10 + 45 + 10 = 282.5$

\therefore New time is 22.5 secs longer at least.

Total time = $60 + 180 + 50 = 290$

Time to reach 50 ms⁻¹ = 10 secs

$20 + 0 = 0$

$20 = 10 \cdot a$

$a = 2$
